ENHANCE YOUR PRACTICE'S EXPERTISE

VISIOFFICE® 2 measures all physiological and behavioral parameters. It helps increase your personalized lens sales, patient loyalty and differentiate your practice.

Quick and Accurate Measurements

- › High resolution lens centration with an HD camera.
- › Measurements exclusive to Essilor lenses: Eye Rotation Center, dominant eye and Near Vision Behavior.

Ergonomic Design

- › Modern look.
- › Larger range of camera height to adapt to all patients.
- › Metal clip that fits all frames.
- › HD 16/9 touch screen for sharp images.

New Navigation & Measurement Workflow

- › Easy navigation to reduce measurement time.
- › Fitting parameters < 40 seconds.
- › All measurements < 3 minutes.

Interactive Sales Tools

- › Demonstrate product benefits with videos & images of everyday situations your clients will relate to.
- › Inform and educate your customers about lenses.
- › Frame selection support with videos or photos.

MAKE THE MOST OF EXCLUSIVE MEASUREMENTS

Advanced technology used for all designs, from single vision to the latest Varilux® digital personalised progressive lenses.

EYE ROTATION CENTER

Fundamental to the personalization of Essilor lenses, eyecode® is an exclusive 3D identification of the rotational center of each eye.

HEAD POSTURE*

Offers tailor-made measurements to the patient and adapts lens centration depending on his/her natural head posture.

DOMINANT EYE

Enables a high level of personalization to give the customer access to a faster vision experience with 4D technology lenses.

*Optional modules.

COMPREHENSIVE SALES AID MODULES

A tool box to accompany you.

Making frame selection easier

Show a simulation of personalized lenses

Education

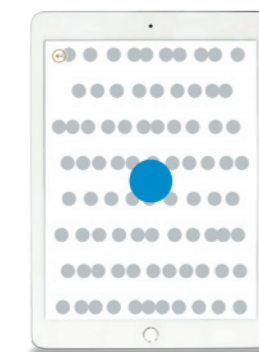

The benefits of premium lenses

NEAR VISION BEHAVIOR*

Visioffice® 2 allows a seamless and accurate process with the Near Vision Behavior measurements, necessary for the latest generation of progressive lenses - the Varilux® X Series™ lenses.
